PEARL ECHO WEB FILTERING SELECTED AS FINALIST FOR SC MAGAZINE HONOR

Exton, PA – November 16, 2006 - Pearl Software, Inc., a leading provider of Employee Internet Monitoring and Web Filtering software announced that its enterprise-class Pearl Echo‑Suite™ has been selected as a finalist for the 2007 SC Magazine Reader's Trust award in the Best Web Filtering category. The Excellence Awards recognize leading products and companies as decided by a panel of industry luminaries from the analyst and end-user communities.

"We have gone to considerable lengths to support our customers over the years including keeping our code developers on the technical support frontline," said Joe Field, Pearl Software's CTO. "It's heartening that users of our Web Filtering and Employee Internet Monitoring and Control solutions have, in turn, come out to support us with this honor." Pearl Echo and the four other remaining finalists for the best Web Filtering solution were selected from a group of a dozen companies originally nominated for the honor.

Pearl Echo-Suite is an e-communications monitoring, filtering, and control solution enabling effective management of employee Internet usage in mobile, desktop and server-centric environments. Echo-Suite actively captures employee web browsing, file transfers, news, chat, IM, e-mail and web-mail, including all encoded attachments. Internet access permissions can be set at the group and user level, based on time controls, keyword triggers, allow-lists, block-lists and a dynamic library of web domain category filters. More information on Pearl Software and its suite of products can be found at http://www.pearlsw.com.

About Pearl Software

Pearl Software was founded in 1996 by David Fertell and Joe Field. The company provides Internet monitoring, filtering and control products to the growing Internet user community. Pearl Software's key patent-pending products include Pearl Echo-Suite™, Website-Echo™ and IM-Echo™. The company also offers browser control software, TakeMeHome™ and partners with law enforcement to extend the application of its remote and mobile Internet monitoring and control capabilities.
